DESIGNING YOUR PERFECT SPACE

All of our products can be configured the way you want it. We make this easy, with options and accessories to make it yours.

CHOOSE A BASE DESIGN

MAKE IT YOURS

BASIC

PERSONALIZED

WELCOME

Since 1994 Weaver Barns has been building two things—structures and a reputation for unmatched quality. We strive to provide the best in everything we do, from customer service to manufacturing to installation. Quite simply, we provide you an excellent product that you and your family will enjoy for many years to come.

Weaver Barns *ltd.*
"everyone needs a little structure in their life"

DESIGN STYLES

To find a style that best fits your standards, we have a large variety of features for you to choose from. These styles are all unique and customizable, so you can find one that fits best into your space. Unlike other brands, our designs are not only based on appearance, but also on their functionality and durability. If you aren't sure what style will work best for your structure, our team is always eager to help guide you by giving recommendations specific to you and what you're looking for.

OLD WORLD GARDEN FARMS

Weaver Barns gives flexibility, the ability to customize, and most importantly, quality, to each customer we serve. Customers Jim and Mary from *Old World Garden Farms* fell in love with our designs and their ability to customize our structures to work specifically for their needs. Featured on this page are a few of the structures we have built with them. You can find more features on these building projects at their home and garden website. oldworldgardenfarms.com

STRENGTH

A No Compromise Approach to Quality

At Weaver Barns, our culture is quality. Every aspect of the projects we do is done right. We care about building something that will last. We understand that our customers need a space that will stand the test of time. From custom milling our floor boards to buying premium grade lumber, to using the finest materials we can source, we do not just build a shed, we build the Weaver way.

FOUNDATION TYPES

BLOCK SITE PREP

*Not Recommended For Grades Exceeding 8"

Place 8" x 16" x 4" cement blocks underneath the skids. Every skid needs a block at the front and back and then additional blocks need to be placed in the middle spaced not more than 6' apart.

LIMESTONE PAD

*The Most Popular Choice For Sheds

Spread 4" of #57 limestone in a level pad 12" beyond the width and the length of the building on all sides. Also, you may want to use a 4 x 4 as an edge as shown in the example below.

CONCRETE FOUNDATIONS

Pour the pad 1/2" less than the dimensions of the building. We attached treated plates to the bottom of the walls protecting the walls from moisture and rot. These bottom plates are fastened to the concrete pad with anchors or bolts.

POST PLATFORM FOUNDATION

Use treated posts. Dig the post holes 32" - 42" deep. Place post pad or concrete in the bottom of the hole. Insert posts. Fasten cross beam joints with bolts to posts as shown making sure that the entire structure is square.

SHED ON SLAB

To attach a shed to a slab, have your concrete contractor add a 4" reinforced curb. This will keep water from entering the structure.

SKID PLACEMENT

OUR PRICES INCLUDE DELIVERY

WE DELIVER TO YOUR SITE

PREBUILT &
DELIVERED

— OR —

DELIVERED &
BUILT ON SITE

DAY OF DELIVERY

CARRY CHARGES

Since every building site is different, one of the challenges of construction is how close to the building site we can drive to. For your convenience, we include a fifty foot carry allowance in the pricing for buildings 14'-16' wide. For buildings 8'-12', we include one hundred feet free. Over those distances the crew will charge \$1.00 per foot over the allowed distance.

**Carry Charges Are Paid To The Crew Directly*

WHAT SIZE IS RIGHT?

When determining what size is right for your structure, we encourage you to talk to one of our qualified team members to figure out what works best for you. There are a lot of decisions that go into creating a structure, and we want to make that process as easy as possible for you, whether it's a custom garage or even a shed.

T BASICS

STANDARD ON BACKYARD BASICS SHEDS

BACKYARD BASICS

Simple is sometimes better. At Weaver Barns, we decided to take this principle and turn it into our BACKYARD BASICS. Using our core models, we created this new line that focuses on simplicity.

2 YEAR LIMITED WARRANTY

The first model, the JACKSON, features a classic gable-style roof. We created this design with a focus on functionality and simplicity. This model is a fantastic option for those in search of a storage space or workshop.

If you're looking for a reliable and spacious storage solution, the NEW HAVEN is an excellent option. With its classic roof design, this structure will be a standout addition to your property and will impress anyone who sees it.

Our third model, the ADDISON, stands out with its clean lines and modern shed roof. This design makes the perfect pool house, studio, or garden shed!

Our fourth and last design in this collection is the CAMDEN. This classic-style pavilion will make your backyard the envy of the neighborhood with its simple yet classic elegance.

GARAGES

Looking For A Garage? Discover The Process.

Step 1 - Size?

WHAT SIZE DO I NEED?

The first step in your design journey begins with size. What will you need to store, and what would you like to do with the space. Answering these questions early will save you time, money, and energy.

Layout Size Ideas

18x24 ONE CAR 432 Sq. Ft.

24x30 TWO CAR 720 Sq. Ft.

30x40 THREE CAR 1200 Sq. Ft.

Step 2 - Design?

NOT THE LOOK YOU WANT?

All of our models are base designs. We fully expect you to design the project to your ideas. Use our models as a basic concept, but don't limit yourself. We are a full custom builder. You dream it, we build it.

Step 3 - Foundation Type?

Block Foundation

Mono Pour Foundation

Step 4 - Permits?

Weaver Barns builds in several different States. We ask the customer to be involved and pull the permits on projects that require that. We can provide the permit drawings and technical details required. Not all projects require permits, please inquire with local building, zoning, HOAs or any regulatory agency in your area.

Step 5 - Construction?

Once you have these steps completed, you will be ready for construction to begin. Our team will help guide you throughout this process, and make it as smooth as possible. Remember, it is construction. Variables are to be expected. Things like weather can play a large role in meeting project milestones. We do our best to be as efficient as possible.
