Weaver Barns *ltd.*

"everyone needs a little structure in their life"

WHY WEAVER?

Building a strong reputation in the construction industry comes from a vision focused on great employees and great customers. For more than 30 years, Weaver's has built projects for tens of thousands of satisfied customers. The only way we have achieved this impressive result is through our amazing team. It takes real effort, thoughtful planning, vision, and service to build a company that consistently delivers quality products decade after decade. We appreciate your trust in our business to create a space that means so much to your life, passions, and memories.

DESIGN & INNOVATION BY WEAVER BARNES

QUALITY We use the highest-quality materials in the industry to ensure your structure stands the test of time. Everything we build is driven by our commitment to strength, durability, and long-term reliability.

DESIGN We care about the appearance of our buildings. Beyond function, we design and build each structure with the intention to complement your home seamlessly and bring your dream space to life with professional craftsmanship.

CUSTOMER SERVICE From point of sale to project completion, we prioritize the customer experience. Our experienced team is dedicated to ensuring a smooth, professional, and seamless process every step of the way.

OLD WORLD GARDEN FARMS

Weaver Barns provides flexibility, customization options, and, most importantly, quality to every customer we serve. Customers Jim and Mary from Old World Garden Farms fell in love with our designs and appreciated the ability to tailor our structures to their specific needs. Featured on this page are a few of the structures we have built for them. You can find more details on these building projects on their home and garden website. oldworldgardenfarms.com

WHAT SIZE IS RIGHT?

When determining the right size for your structure, we encourage you to speak with one of our qualified team members to figure out what works best for you. There are many decisions that go into creating a structure, and we want to make the process as easy as possible, whether you're designing a custom garage or a simple shed.

FOUNDATION TYPES

BLOCK SITE PREP

*not recommended for grades exceeding 8"

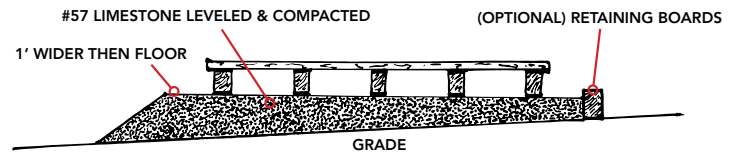

Place 8" x 16" x 4" cement blocks underneath the skids. Every skid needs a block at the front and back and then additional blocks need to be placed in the middle spaced not more than 6' apart.

LIMESTONE PAD

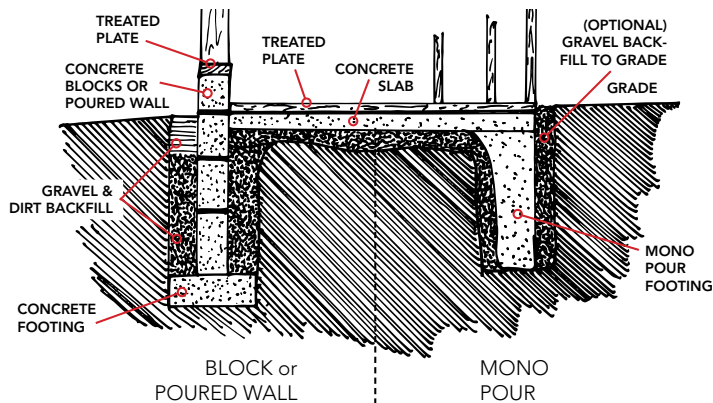

*the most popular choice for sheds

Spread 4" of #57 limestone in a level pad 12" beyond the width and the length of the building on all sides. You may want to use a 4 x 4 as an edge, as shown in the example below.

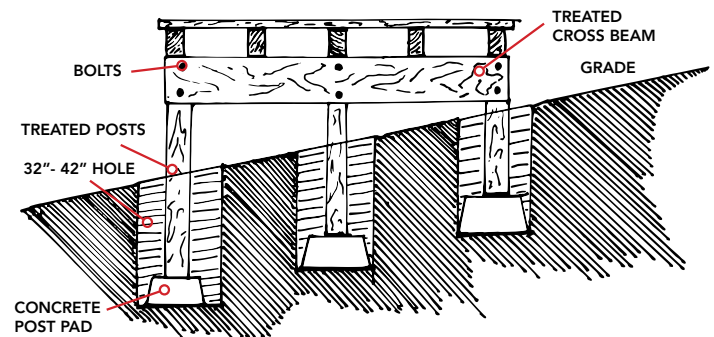

CONCRETE FOUNDATIONS

Pour the pad 1/2" less than the dimensions of the building. We attach treated plates to the bottom of the walls protecting the walls from moisture and rot. These bottom plates are fastened to the concrete pad with anchors or bolts.

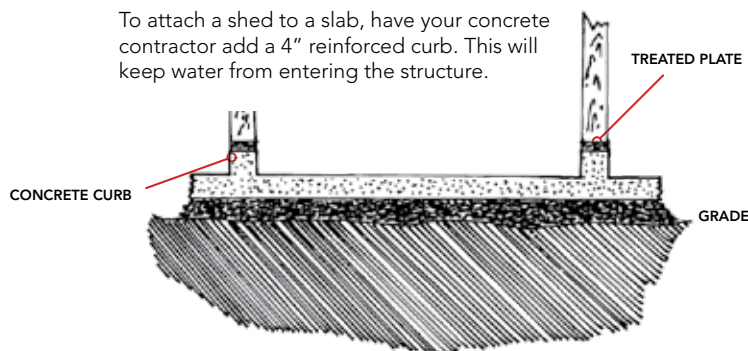

POST PLATFORM FOUNDATION

Use treated posts. Dig the post holes 32" - 42" deep. Place the post pad or concrete in the bottom of the hole. Insert posts. Fasten cross-beam joists with bolts to posts as shown, making sure that the entire structure is square.

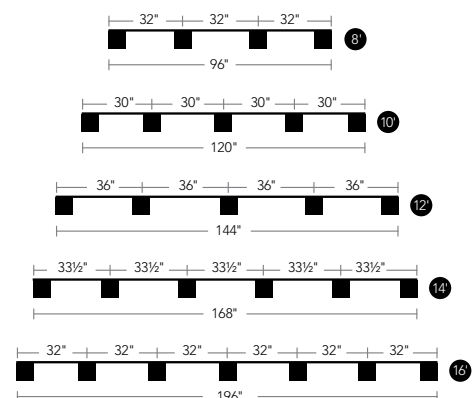

SHED ON SLAB

To attach a shed to a slab, have your concrete contractor add a 4" reinforced curb. This will keep water from entering the structure.

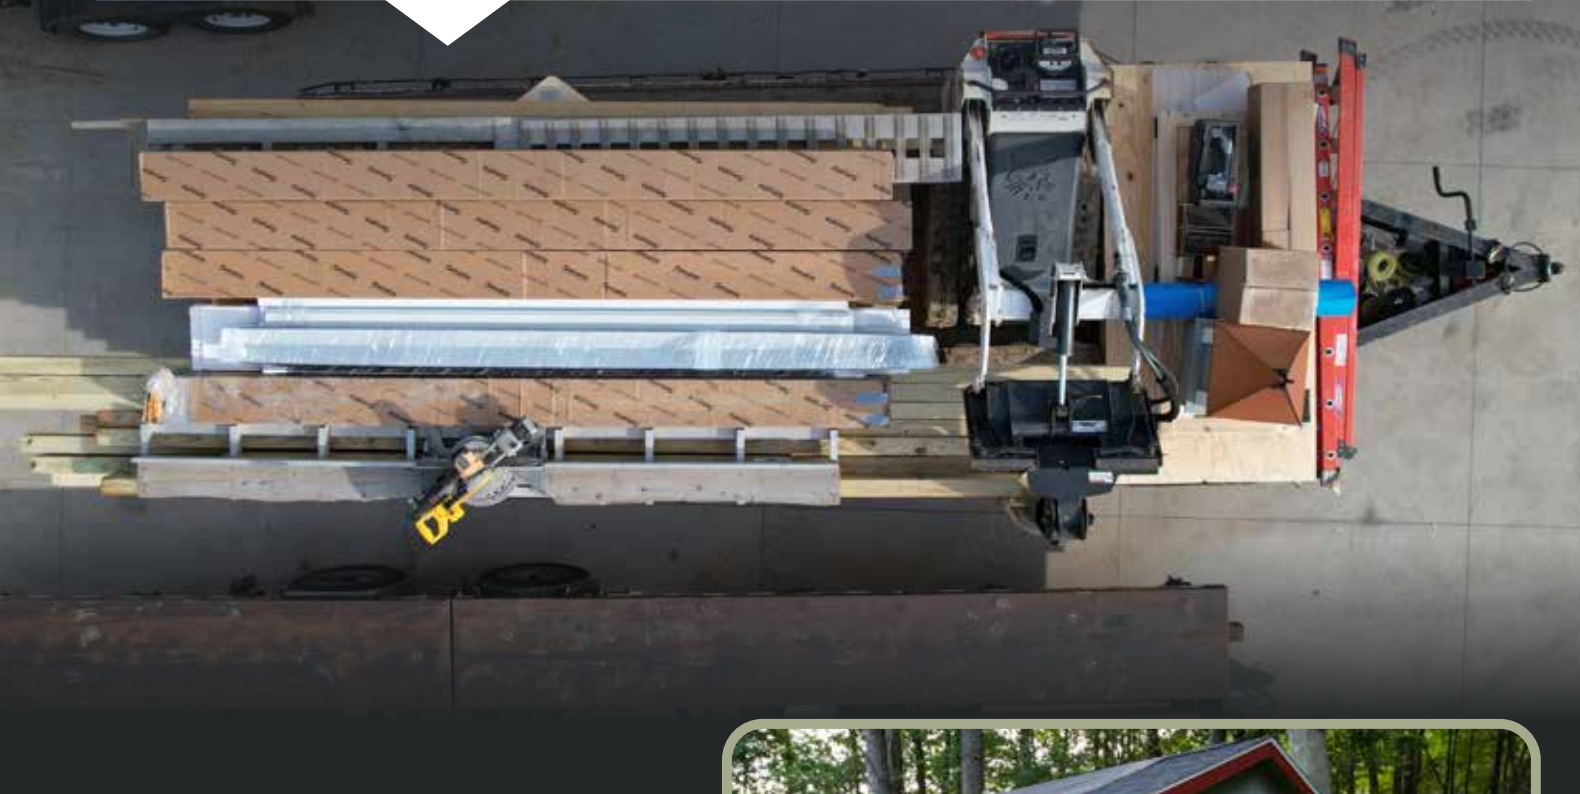

SKID PLACEMENT

OUR PRICES INCLUDE DELIVERY

WE DELIVER TO YOUR SITE

**PREBUILT &
DELIVERED**

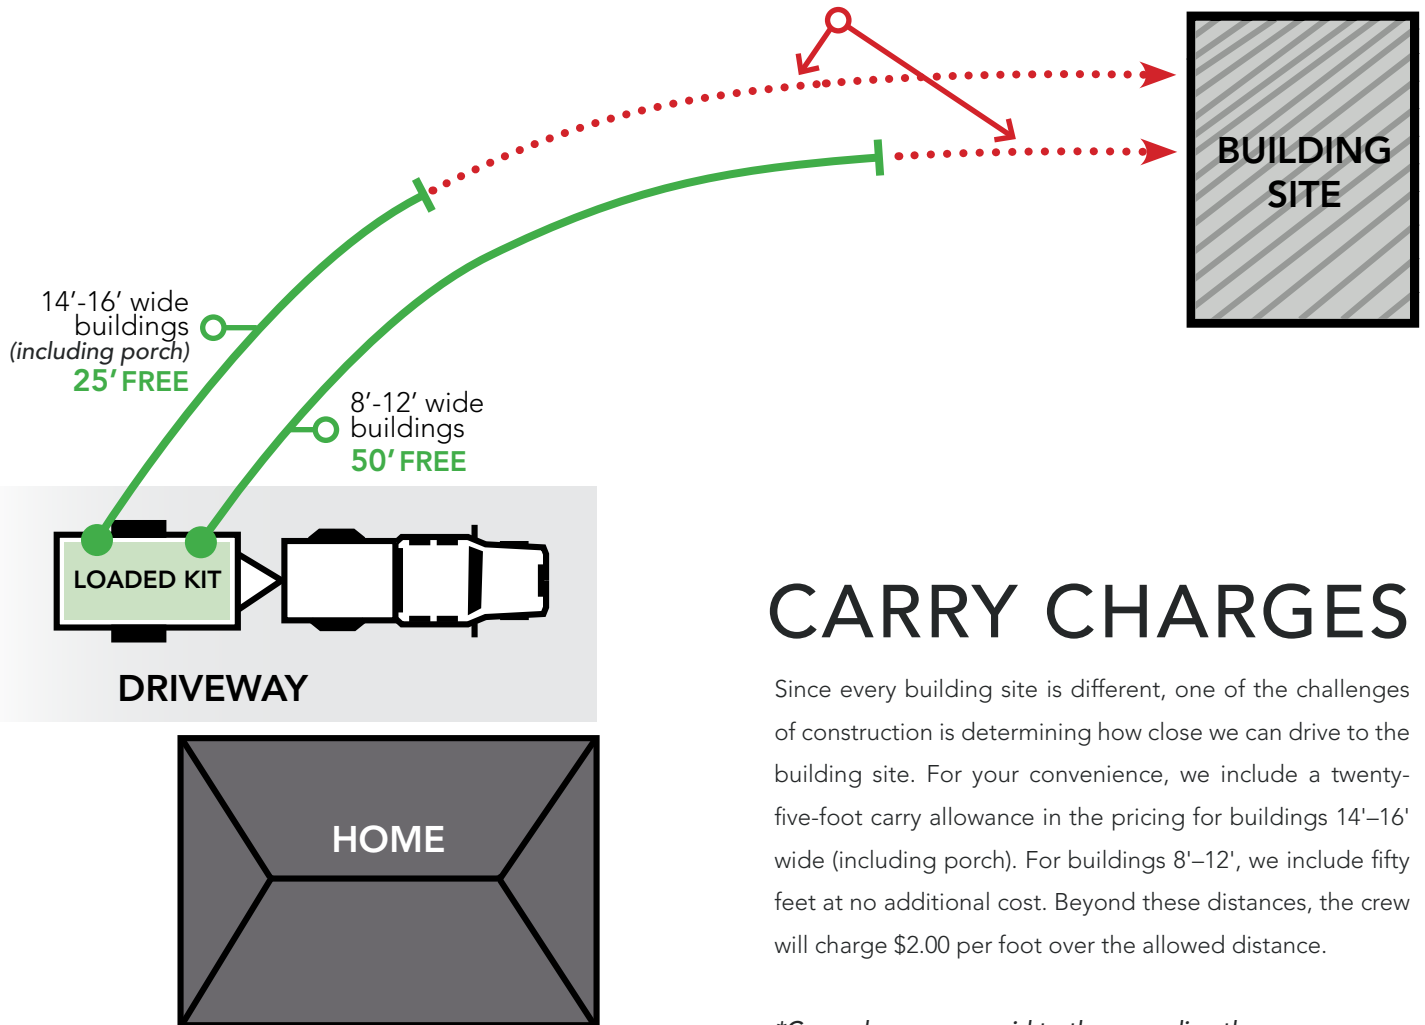

— OR —

**DELIVERED &
BUILT ON SITE**

DAY OF DELIVERY

APPLIES BEYOND FREE DISTANCE
\$2.00 per foot carry charge

CARRY CHARGES

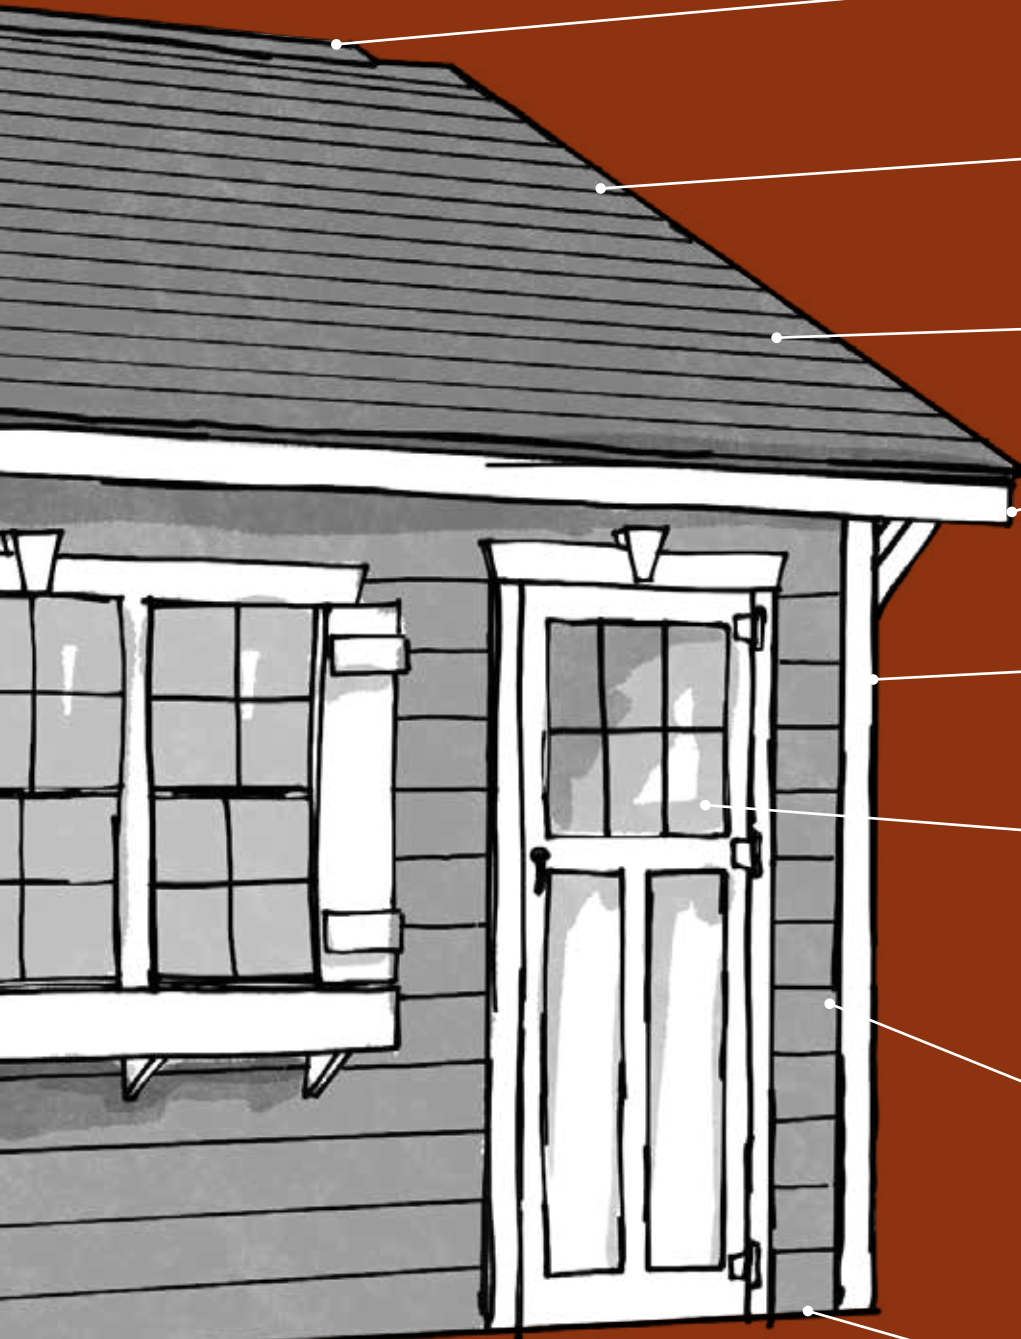

Since every building site is different, one of the challenges of construction is determining how close we can drive to the building site. For your convenience, we include a twenty-five-foot carry allowance in the pricing for buildings 14'-16' wide (including porch). For buildings 8'-12', we include fifty feet at no additional cost. Beyond these distances, the crew will charge \$2.00 per foot over the allowed distance.

**Carry charges are paid to the crew directly.*

TBASICS

STANDARD ON BACKYARD BASICS SHEDS

BACKYARD BASICS

Simple is sometimes better. At Weaver Barns, we took this principle and turned it into our BACKYARD BASICS. Using our core models, we created this new line with a focus on simplicity.

2-YEAR LIMITED WARRANTY

The first model, the JACKSON, features a classic gable-style roof. We designed this model with a focus on functionality and simplicity. It is a fantastic option for those in search of a storage space or workshop.

Our mono-slope model, the ADDISON, stands out with its clean lines and modern shed roof. This design is perfect as a pool house, studio, or garden shed.

If you're looking for a reliable and spacious storage solution, the NEW HAVEN is an excellent choice. Featuring a classic roof design, this structure is a perfect addition to your property, adding a timeless and traditional look.

The fourth and final design in this collection is the CAMDEN. This classic-style pavilion will make your backyard the envy of the neighborhood with its simple yet timeless elegance.

POST ABOVE GRADE

OUR INCLUDED INSTALLATION METHOD

GARAGES

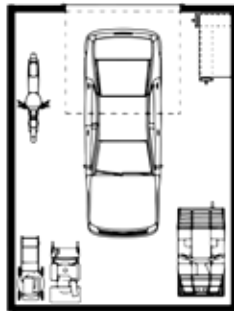

Looking for a garage? Discover the process.

Step 1 - WHAT SIZE?

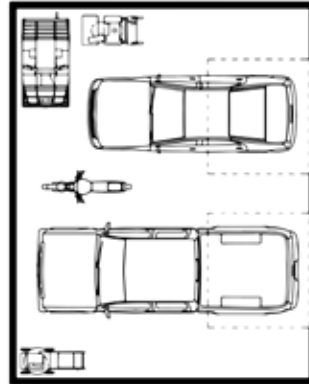

WHAT SIZE DO I NEED?

The first step in your design journey begins with size. What will you need to store, and what would you like to do with the space? Answering these questions early will save you time, money, and energy.

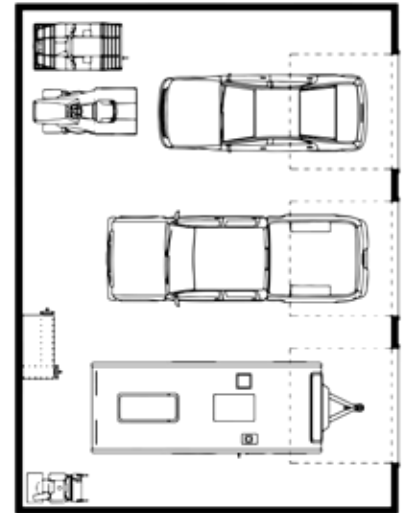

Layout Size Ideas

18x24 ONE CAR 432 Sq. Ft.

24x30 TWO CAR 720 Sq. Ft.

30x40 THREE CAR 1200 Sq. Ft.

Step 2 - DESIGN OPTIONS?

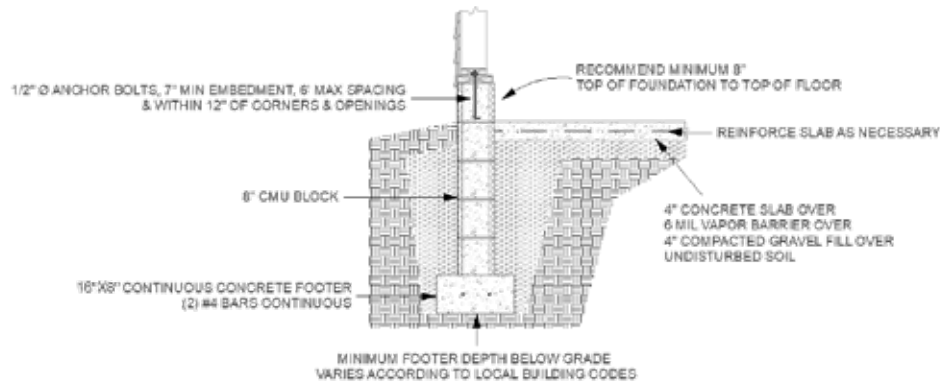

NOT THE LOOK YOU WANT?

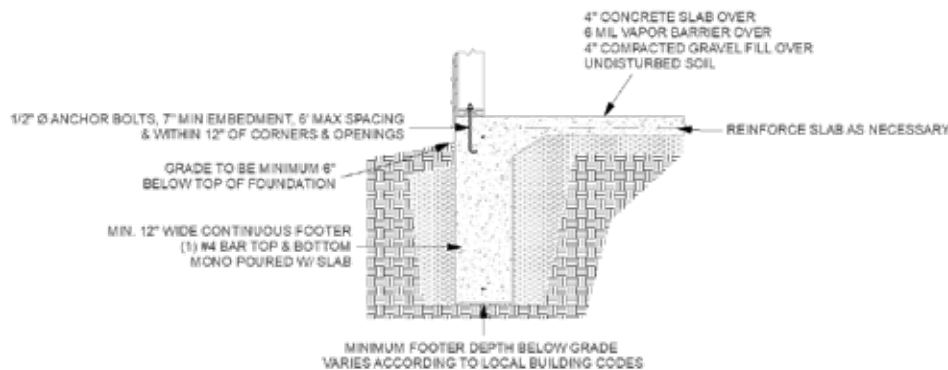

All of our models are base designs. We fully expect you to design the project to reflect your ideas. Use our models as a basic concept, but don't limit yourself. As a full custom builder, we turn your dreams into reality.

Step 3 - WHAT FOUNDATION TYPE?

Block Foundation

Mono-Pour Foundation

Step 4 - PERMITS?

Weaver Barns builds in several different states. We ask the customer to be involved and pull the permits on projects that require that. However, we can provide the permit drawings and technical details required. Not all projects require permits, so please inquire with local HOAs, building and zoning agencies, or any other regulatory agency in your area.

Step 5 - CONSTRUCTION PROCESS

Once you have completed these steps, you will be ready for construction to begin. Our team will help guide you throughout this process and make it as smooth as possible. In construction, variables are to be expected. Factors like weather and other delays play a large role in meeting project milestones. We do our best to work around these obstacles and be as efficient as possible.

RECREATIONAL BUILDING

24x40 Personalized Design | Artist Depiction of A Real Customer Project

Weaver Barns is a custom project builder specializing in thoughtfully designed spaces tailored to each client's needs. This project features a living area, workout room, kitchen, pool utility room, and an upstairs golf simulator, creating a versatile recreational building that can be fully personalized to fit your lifestyle.

These designs reflect the specific features and customizations our customers requested from us.

Create a personalized structure designed to perfectly fit your needs and lifestyle today!

TIMBER POOLHOUSE

20x28 Personalized Design | Artist Depiction of A Real Customer Project

This Poolhouse, designed by a customer, draws from our popular Timber Ridge pavilion design. A 14-foot section was enclosed to create a dedicated utility, storage, and changing room area. Additional sought-after options include integrated kitchen spaces with serving doors and a bar, allowing the structure to function as both a practical and social centerpiece.

These designs reflect the specific features and customizations our customers requested from us.

Create a personalized structure designed to perfectly fit your needs and lifestyle today!

A-FRAME CABIN

20x24 Personalized Design | Artist Depiction of A Real Customer Project

This 20x24 A-frame cabin offers classic mountain style in a compact, efficient layout. Vaulted ceilings and an open living area create a bright interior with a full kitchen and bath, while an upstairs loft provides a private sleeping space. A metal roof, lap siding, and front deck complete the design with rustic charm and modern comfort.

These designs reflect the specific features and customizations our customers requested from us.

Create a personalized structure designed to perfectly fit your needs and lifestyle today!

HORSE BARN

36x60 Personalized Design | Artist Depiction of A Real Customer Project

Designed to balance form and function, this 36x60 horse barn combines classic agricultural character with a refined, modern layout. A wide aisle serves as the backbone of the design, leading to six full-size horse stalls and supported by well-planned spaces for tack, feed, a wash bay, hay storage, and a private bath.

These designs reflect the specific features and customizations our customers requested from us.

Create a personalized structure designed to perfectly fit your needs and lifestyle today!
